4. CBAM Transitional Registry - Demo

## Section 1

# CBAM reporting declarants, customs representation and obligations 

## CBAM reporting declarants

## Art. 2 Implementing Regulation 2023/1773:

## WITHIN THE CUSTOMS TERRITORY OF EU:

- Importer who lodges a customs declaration for release for free circulation of goods in its own name and on its own behalf
- The person, holding an authorisation to lodge a customs declaration who declares the importation of goods (customs declarant)

## OUTSIDE THE CUSTOMS TERRITORY OF THE EU:

- The indirect customs representative, where the customs declaration is lodged by the indirect customs representative appointed, when the importer is established outside the European Union or where the indirect customs representative has agreed to the reporting obligations

Food Chain Safety Food Chain S
Environment

## Customs representation

## DIRECT CUSTOMS REPRESENTATION (1/2)

- Only lodging a customs declaration for CBAM goods (Annex I of the CBAM Regulation 2023/956)

## > Status of customs declarant

- Responsible for the accuracy and completeness of the information given in the declaration; the authenticity, accuracy and validity of any document supporting the declaration; where applicable, compliance with all of the obligations relating to the placing of the goods in question under the customs procedure concerned, or to the conduct of the authorised operations (art. 15 Regulation 952/2013 - UCC)
- Recommended to check prior to lodging a customs declaration for release for free circulation of CBAM goods, if the person on whose behalf the declaration is lodged fulfils the requirements of the CBAM Regulation
Health
Food Chain Safety Environment

## Customs representation

## DIRECT CUSTOMS REPRESENTATION (2/2)

- Not possible to bear CBAM-related reporting obligations
> An importer established in the EU can use distinct customs representatives for the customs declaration and the CBAM reporting. However, the importer cannot use distinct indirect representatives for the CBAM goods covered by the same customs declaration
[1 customs declaration = 1 indirect representative]

## Customs representation

## INDIRECT CUSTOMS REPRESENTATION

- Status of reporting declarant
- An importer can have several indirect representatives, each responsible for the CBAM goods declared in one customs declaration
- For importers established in the EU: at discretion of the indirect representatives whether to bear reporting obligations
- For importers established outside the EU: indirect representatives shall submit the CBAM reports

Health
Food Chain Safety Environment

## Obligations

## - WITHIN THE CUSTOMS TERRITORY OF EU:

> Importer bears the CBAM reporting obligations
> Indirect customs representative can refuse to fill the reporting obligations on behalf of the importer (art.8.3 of the Implementing regulation 2023/1773), but shall notify the importer re-CBAM obligations

- OUTSIDE THE CUSTOMS TERRITORY OF EU:
> Indirect customs representative bears CBAM reporting obligations

Health
Food Chain Safety Environment

## Obligations

>Only importers and indirect customs representatives can submit CBAM reports in the CBAM Transitional Registry
$>$ Direct customs representatives, third or neutral parties cannot submit CBAM reports on behalf of the importers or indirect representatives

## Section 2

## Penalties

be

## Penalties

- Applicable only if:
$>$ The reporting obligations are not met
$>$ The CBAM report is incorrect or incomplete, and the reporting declarant has not taken the necessary steps to correct the CBAM report after the competent authority initiated the correction procedure.
- Measure of 'last resort’, after communication with the NCA
- More flexibility until 31.07.2024, as the reports can be still amended
> Reporting deadlines do NOT change (first deadline 31.01.2024)

## Penalties - principles and thresholds

- Between EUR 10 and EUR 50 per tonne of unreported emissions. Higher penalties if the delay in submitting the report exceeds six months.
- The exact amount will be determined according to the following factors:
> The extent of the unreported information
$>$ The unreported quantities of imported goods and their unreported emissions
> The willingness of the declarant to provide more information or to correct the CBAM report as requested
$>$ The intentional or negligent behaviour of the declarant
$>$ The declarant's past behaviour in relation to compliance with reporting obligations
> The level of cooperation of the declarant in putting an end to the infringement
$>$ Whether the declarant has voluntarily taken steps to ensure that a similar infringement cannot be committed in the future.

## Section 3

## CBAM Reporting

## Content of the CBAM report

- Quantity of goods (in tons, or in MWh for electricity) in the scope of CBAM being imported to the EU during the previous quarter
- Direct CO2 emissions embedded in the goods being imported to the EU at installation or production site level
+ Nitrous oxide emissions for some fertilizer goods
+ Perfluorocarbons (PFCs) emissions for some aluminum goods
- Indirect emissions embedded in the goods
- Any carbon price due or paid in the country of origin for the embedded emissions in the imported goods, deducting any rebate or other form of compensation already received

## Timeline for 2024

End of the use of default values (except for electricity)
01.01.2025: Application of the EC methodology for monitoring and reporting

CBAM reports are due only if CBAM goods are imported and released for free circulation during the reporting period

## Processing the CBAM report

## Format

- CBAM report structure is given in Annex I to the Implementing Regulation 2023/1773.
- Tools to facilitate the report:

1. CBAM Communication template for installations (Excel spreadsheet)
2. CBAM report has been digitally integrated into the CBAM Transitional Registry

## 1. CBAM Communication template for installations

| Template | Summary of information required |
| :---: | :---: |
| Part 1 General information (compulsory) | Data to be communicated to the reporting declarant: <br> - Installation data, comprising identification and location details for the operator's installation, and contact details for the operator's authorised representative. <br> - The production processes and routes under each aggregated goods category at the installation. <br> - For each aggregated goods category or separately for each good by CN code: <br> - The direct and indirect specific embedded emissions of each good; and for SEE indirect detail on how the emission factor was determined and the information source used; <br> - Information on what data quality and methods (calculation-based, measurement-based, other) were used for determining embedded emissions, and whether this was based fully on monitoring, or if default values were used; <br> - If default values were used, a short description why these were used instead of actual data; <br> - Information on additional sector-specific reporting parameters for goods produced, if required; and <br> - If applicable, information on a carbon price due, and separately for any precursors obtained from other installations, by the precursors' country of origin. |

## 1. CBAM Communication template for installations

\(\left.$$
\begin{array}{|l|l|l|}\hline \text { Template } & \text { Summary of information required } \\
\hline \text { Part 2- } \\
\text { (optional) }\end{array}
$$ \quad \begin{array}{l}- The total emissions of the installation, including: activity data and calculation factors for each source stream used; <br>
emissions of each emission source monitored using a measurement-based methodology, and emissions determined <br>
by other methods; and if applicable, any CO2 imports or exports to other installations, for the reasons outlined <br>

above.\end{array}\right]\)| A 'heat balance' of imported, produced, consumed and exported measurable heat, and similarly balances for |
| :--- |
| waste gases or electricity. |

## 2. CBAM report has been digitally integrated into the CBAM Transitional Registry

| Registry/ CBAM <br> Report structure | Summary of the CBAM report content (Annex I) |  |
| :--- | :--- | :--- | :--- |
|  | -Report issue date, ID, reporting period and year. <br> Section 1- Header | - <br> - <br> Total quantity of goods imported and total emissions. <br> Identity and contact details of Reporting declarant, Representative, Importer and <br> Competent Authority, as applicable. |
|  | - Approval process for report submission. |  |

## Default values

- Now available on the EC/CBAM webpage and the CBAM Transitional Registry
- Limit use of default values to exceptional cases where information are not - or no longer - available (i.e. vintage, manufacturing companies ceased their activities, etc.)
- Preference shall be given to actual data
- Possibility to use default values until 31 July 2024
- Normal use of default values for electricity
- During the transitional phase, default values can be used up to 20\% of the total embedded emissions of complex CBAM goods

## Section 4

## CBAM Transitional Registry - Demo

## Reporting declarant

## WHO CAN SUBMIT CBAM REPORTS?

Importer
Indirect Customs Representative (EU-established companies)

Indirect Customs Representative (non-EU established companies)
Direct Customs representative
Other third parties

REMINDER

CBAM test environnement :
https://conformance.cbam.ec.europa.eu/declarant/\#/home

## CBAM Transitional Registry

- Under section ‘My Quarterly Reports' - clicking ‘create’

(i)
It will be possible to create a report only after the end of the reporting period

## STEP 1: Filling the 'HEADER INFO’

- (Reporting) declarant
- Importer
- (Indirect Customs) Representative
- Competent authority
- Signatures

## (Reporting) declarant

If an importer is defined in Header level of CBAM Report, it will be applied for every good item.

If the report includes multiple importers, they need to be defined separately for each good.

## Importer (1/2)

## OPTION 1: IMPORTER = (REPORTING) DECLARANT

## Importer (2/2)

OPTION 2: IMPORTER = (REPORTING) DECLARANT;
(REPORTING) DECLARANT = (INDIRECT CUSTOMS) REPRESENTATIVE

## Representative (1/2)

## OPTION 1: (INDIRECT CUSTOMS) REPRESENTATIVE = (REPORTING) DECLARANT

If the reporting declarant is the importer's representative for all goods, the checkbox could be checked to avoid filling the same information again.

## Representative (2/2)

## OPTION 2: (INDIRECT CUSTOMS) REPRESENTATIVE = (REPORTING) DECLARANT

## Competent authority

The NCA reference number is automatically filled in based on the EORI number (country of the Reporting Declarant)

## Signatures

$\checkmark$ I certify that to the best of my knowledge the information provided on this form and attachments is accurate and complete
I confirm that the data and information provided in this CBAM Report are to be used and shared between the EU commission and Competent Authorities in accordance with Regulation (EU) 2023/956 of the $\checkmark$ European Parliament and of the Council of 10 May 2023 establishing a carbon border adjustment mechanism, Commission Implementing Regulation (EU) 2023/xxxx laying down the rules for the application of Regulation (EU) 2023/956 of the European Parliament and of the Council as regards reporting obligations for the purposes of the carbon border adjustment mechanism during the transitional period, and Union or national law.

Health
Food Chain Safety
Food Chironment
End

## STEP 2: Filling the 'GOODS IMPORTED'

- Goods imported
- Installations
- Emissions
- Parameters
- Carbon price due
- Supplementary

## Goods imported

CBAM report only includes CBAM goods and their related embedded emissions.

## Installations

## Emissions

## Parameters

This is not a mandatory field. It helps to justify the emissions calculated and refers to the production methods used. Data are pre-filled based on each CN code.

## Carbon price due

## Supplementary

## Submission of the CBAM report
